The Dozer Company

Measurement Guide Outside Corners

If it applies, remove cover and existing end caps for measurements. Leave backplate in place.
Measurements are referenced from facing directly at the radiator.

- L measurement from outside corner of left and right walls to farthest left of radiator include any fittings such as valves and piping _____ in
- R measurement from outside corner of left and right walls to farthest right of radiator include any fittings such as valves and piping _____ in
- B measurement from floor to top of existing backplate enter highest measurement from either wall if no existing backplate, skip _____ in
- X measurement from outside corner to left baseboard trim if no baseboard trim, skip _____ in
- Y measurement from outside corner to right baseboard trim if no baseboard trim, skip _____ in
- D measurement from floor to top of heating element fin _____ in
- E measurement from wall to front of heating element fin enter highest measurement from either wall _____ in

In some situations you may have to cut away a section of the baseboard trim in order to install the covers flush to the wall. In order to prevent any gaps in the transition from the covers to the baseboard trim, please try to provide as many measurements as possible.
