 measurement from wall to front of heating element fin
- E take measurement at a few points and enter highest value _____ in

Corners, Walls, and Trim, Oh My!

**Measurement Guides for 90 degree corners available on our website.
 Please contact us for all other situations!**

In some situations you may have to cut away a section of the baseboard trim in order to install the covers flush to the wall. In order to prevent any gaps in the transition from the covers to the baseboard trim, please try to provide as many measurements as possible.
